# /\* Vaccine

# A Guide for **Young Adults**

► Cancer of the cervix

► Cancer of the penis, vagina, vulva, or anus

HPV is a very common virus that can lead to:

► Genital warts

HPV vaccine can prevent these!

#### Do I really need HPV vaccine? Yes!

You should get HPV vaccine because it can prevent some types of cancer and genital warts.

# Do I need it if I haven't had sex yet? Yes!

- You don't have to have sex to catch HPV, but sex increases your risk.
- You can get HPV by skin-to-skin intimate contact.
- People can get and spread HPV without knowing it.
- It's best to get vaccinated before you ever have sex.

## Should I get HPV vaccine if I've already had sex? Yes!

You still need to get vaccinated even if you have had sex. The vaccine provides a lot of protection.

## Why do I need 3 shots?

You need 3 HPV shots to be fully protected.

### I didn't get the vaccine at age 11 or 12. Should I get it now? Yes!

HPV vaccination is recommended for people ages 9 through 26. Even though it is ideal to get HPV vaccine as a preteen, it is still highly effective in teens and young adults.

#### Is HPV vaccine safe? Yes!

- Millions of doses of HPV vaccine have been given without any problem.
- You may get a sore arm.
- Occasionally, a few people faint, so sit for 15 minutes after getting the vaccine.

Make sure you get all 3 HPV shots. Complete your series!
