Protect Babies from Whooping Cough

If you're pregnant, get a Tdap shot!

Whooping cough is deadly for babies

Whooping cough (pertussis) is a respiratory infection that can cause severe coughing or trouble breathing.

About half of infants who get whooping cough are hospitalized!

1 out of 2

HOSPITAL HOSPITAL

Whooping cough cases across the U.S. have been on the rise since the 1980s.

Pregnant women need to get a Tdap shot

I got my whooping cough vaccine and will encourage everyone caring for my baby to get a shot, too!

This vaccine helps protect you from whooping cough and passes some protection to your baby.

Create a circle of protection around your baby

4 out of 5 babies who get whooping cough catch it from someone at home*

Everyone needs whooping cough vaccine:

Parents

Brothers & sisters

Childcare providers

Grandparents

*When source was identified

Make sure your baby gets all 5 doses of whooping cough vaccine on time

Your baby needs whooping cough vaccine at:

2 months

4 months

6 months

15 thru 18 months

4 thru 6 years

You can get whooping cough vaccines at a doctor's office, local health department, or pharmacy
